With a **15 YEAR** Performance WARRANTY

Targetted incising of ground contact timbers ensures optimum preservative penetration where it matters most.

What makes our 15 year warrantied fence posts so special?

Through a combination of high production and treatment standards, Derek Fox Timber has the confidence to offer the trade a range of Next Generation TANALISED fence posts with a 15 year performance warranty against the premature failure from decay and insect attack:

- selecting FSC® certified quality mixed softwoods
- carefully kiln-drying to ensure an appropriate moisture content
- using the latest award winning EXCALIBUR incising technology at the crucial ground contact zone
- using next generation TANALITH preservative treatment incorporating award winning BARamine technologies
- treated to Use Class 4 (ground contact) specification - BS 8417

*See Warranty Conditions overleaf.

	8'0"	✓	✓	✓
	9'0"	✓		
	10'0"	✓	✓	✓

Other sizes available on request.

DEREK FOX & SONS (Timber) Ltd

Premium fencing timbers

Treated to a 15 YEAR desired service life

Derek Fox Timber also offer a standard range of Premium fencing timbers to give customers a wider choice for this important end use. Our Premium range of timbers is still manufactured to high standards utilising mixed softwood species. They are air-dried or kiln dried before treatment but still treated with next generation TANALITH wood preservative to give an excellent service life.

However these timbers are NOT incised and do not carry our 15 year performance warranty.

WARRANTY DETAIL

Derek Fox INCISED fencing timbers, when used in accordance with the appropriate standards, have a 15 year performance warranty against failure of the timber from fungal decay or insect attack. Customers must register the project use of the warrantied timbers **WITHIN 30 DAYS OF PURCHASE** This can be done by contacting Derek Fox Timber with the relevant information or directly on-line through the Derek Fox Timber web site - www.foxtimber.co.uk

The warranty is for the cost of re-supply by Derek Fox Timber, or the re-supply by Derek Fox Timber (at our option), of a component that is proven to have failed as a result of fungal decay or insect attack within 15 years of supply.

The term 'fungal decay' as used in the warranty refers to wood destroying fungi that feed on and degenerate the wood cell walls. It excludes staining and mould fungi associated with the weathering of wood.

The term 'insect attack' refers to attack by wood digesting insects that destroy the timber structure.

The term 'failed' refers to damage caused by insects and/or fungi to such an extent that the component is no longer fit for purpose.

WARRANTY CONDITIONS

Just like any other product we use in everyday life Derek Fox pressure treated fencing timbers have to be used correctly to ensure they perform correctly.

1. The Derek Fox INCISED fencing timbers must not have been misused or placed in abnormal conditions and must not have been used for any extraordinary purpose which was not drawn to the attention of Derek Fox Timber or the retailer at the time of purchase.
2. Should Derek Fox INCISED fencing timbers be cross cut, notched or bored during installation, then exposed surfaces must be liberally brushed with a suitable brush-on end grain wood preservative to the directions shown on the product label, to protect the integrity of the treatment.
3. Derek Fox INCISED fencing timbers must not be pointed after treatment.
4. The shortening of Derek Fox INCISED fencing timbers should be avoided, if possible. If unavoidable the cut end must be treated with a suitable end grain wood preservative and must never be used in ground contact.

What is Next Generation TANALITH ?

Next Generation TANALITH is a unique formulation product from Arch Timber Protection with over 20 years tried, tested and proven performance in markets around the world. Industrially applied in our own high pressure treatment vessel, it provides an advanced long term protection for our TANALISED timbers against the threat of wood decay and insect attack especially for ground contact applications.

Next generation TANALITH now incorporates BARAMINE application technologies. These technologies help further boost the already impressive performance of TANALITH to provide a more consistent and deeper penetration of the preservative into the wood.

Derek Fox's commitment to YOU

Because of our use of Next Generation TANALITH and the quality of our treatment procedures, Derek Fox Timber has real confidence in the products we send to market. Our **15 year warranty** on our **INCISED fencing timbers** gives you real confidence in their long term performance. In the unlikely event that the timbers should fail due to decay or insect attack within 15 years of purchase then Derek Fox Timber will replace the failed timbers* providing they have been used and installed correctly and not mis-used.

Excalibur Incising Technology

Surface incising of ground contact timbers prior to the industrial application of high pressure preservative treatments, is increasingly being recognised as a proven method to help achieve a more consistent penetration of the preservative into the timber, particularly through resistant heartwood zones.

We incise our 15 year warrantied fence posts in the specific ground zone area using our robust award winning EXCALIBUR R incising machine - which utilises the very latest incising technologies.

*See Warranty Detail and Conditions below.

5. Derek Fox INCISED fencing timbers must not be planed or ripsawn.
6. The warranty covers proven failure by the preservative system only and Derek Fox Timber reserve the right to allow Arch Timber Protection to investigate any claims to ensure that they are relevant.
7. Any claim must be accompanied by proof of purchase.

Exclusions

1. Components used outside of European markets.
2. Components removed from their original installation and re-used at a new location.
3. Failure due to physical damage as a result of mechanical strimming, mechanical installation techniques, or other external forces.
4. Claims for weathering of wood including: ageing, raised grain, splitting, cracking, warping, shrinkage, swelling.
5. Claims for natural movement of wood in service, including weathering, twisting and splitting;
6. Claims for mould growth.
